EXECUTIVE SUMMARY

Prepared for Jeff & Jane Smith
Prepared: October 8, 2026
Prepared by: Daniel Asti · Alto Financial Group

Important Disclosures

This Executive Summary is a condensed presentation derived from the Retirement Fortress Blueprint prepared by Alto Financial Group, together with the account statements and information you supplied. It is intended to be read together with the full Blueprint worksheet and does not replace it. Where figures differ between this summary and the worksheet, the worksheet controls.

The information provided by these projections and calculators is for illustrative purposes only. Estimates included are based on information supplied by the client, such as estimated Social Security benefits, pension benefits, projections of cost of living increases, inflation rates, and federal and state income tax rates. Current federal income tax tables are used in certain calculations. All of these are subject to change and will have an effect on the long-range outcome shown in the analysis. Any interest rates are hypothetical and are not meant to represent any specific investment; the assumptions do not encompass all situations. The projections or other information generated by this report regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results, and are not guarantees of future results. Neither Alto Financial Group, LLC nor AE Wealth Management, LLC (AEWM) makes any guarantees on the outcome of any recommendations made based upon the above information.

Results may vary with each use of the software referenced above. Enhancements and changes to that software may be made in the future, and future reports may contain information, capabilities, and other content that is more expansive or otherwise different from the content of this report. Neither Alto Financial Group, LLC nor AEWM is responsible for the accuracy of the assumptions made in the reports or the calculations in the analyses.

Investment advisory products and services are made available through AE Wealth Management, LLC (AEWM), a Registered Investment Adviser. Neither Alto Financial Group, LLC nor AEWM is a tax or legal advisor. This report does not constitute tax, legal, or accounting advice. You should discuss any tax and legal information outlined in this document with your tax and/or legal advisors prior to taking action. There is no requirement that you implement any strategies detailed in this report. You are responsible for implementing, monitoring, and periodically reviewing and adjusting your investment strategies.

Important Disclosures (continued)

AEWM does not offer insurance products. Insurance products are offered by AFG II, LLC, an affiliate of Alto Financial Group, LLC. Please be advised that insurance products offered generate commissions that are separate and distinct from the investment advisory fees paid by the client for the management of their assets. These commissions are typically paid directly by the insurance company and may vary depending on the type of product purchased and the insurer's applicable compensation structure.

Insurance products are not subject to the same regulatory oversight as investment advisory products and services. While advisory services operate under the fiduciary standard enforced by the Securities and Exchange Commission (SEC) and other regulatory bodies, insurance products are governed primarily by state insurance regulatory authorities. This means that the compliance, oversight, consumer protection mechanisms, and compensation differ between these two types of financial products.

This report is not a financial plan, nor does it constitute an offer to buy or sell, or a recommendation of, any particular product, asset, or investment. The allocations reflected in this report may represent a broad mix of asset classes. The values and information provided by you for use in this report are believed to be complete and accurate to the best of your knowledge; however, neither Alto Financial Group, LLC nor AEWM has independently verified this information.

All investing involves risk, including the potential loss of principal, and there can be no guarantee that any investing strategy will be successful. The information in this report represents an assessment of investments at a specific point in time and is not intended to be a forecast or a guarantee of future results. The information is based on data gathered from what we believe are reliable sources and is not guaranteed. The information presented does not constitute a solicitation for the purchase or sale of any security and is not a recommendation of any kind. Past performance does not guarantee future results.

The information in this report is intended solely for the addressee(s). Access, copying, dissemination, or re-use of information in it by anyone else is unauthorized. If you received this report in error, you may not copy or use the contents, attachments, or information in any way.

What You Told Us Matters Most

1 Make savings last for life

Jeff and Jane want their money to support them well past age 94, covering about $50,000 a year in everyday spending plus $1,500 a month of fun money, without a market drop cutting their plan short by around 10 years.

2 Keep more of it from taxes

Jeff wants to cut the roughly $683,000 in projected lifetime taxes. The next 8 to 10 years, before required withdrawals begin, are a chance to use lower tax rates, including on Social Security.

3 Jane to Retire at 60 and 8 months

Jane wants to stop working at 60 years 8 months and take her pension at 62, about $1,830 a month. They want the pension choice to keep income going for whichever of them lives longer.

4 Get the best from Social Security

Jeff started at $2,677 a month in February and worries he gave up benefits by claiming early. They want to know whether to reverse it, and when Jane should start hers.

5 Pass wealth on to family

Jeff wants to help his three granddaughters and children, avoid Pennsylvania inheritance tax, and have wills and trusts in place, learning from what happened with his sister and brother-in-law's estate.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Needs are the bills that must be paid whatever the markets do — housing, food, insurance, healthcare, transportation and debt payments. Wants are the things that make retirement enjoyable — travel, dining, hobbies and giving. The Fortress funds the two differently: Needs from protected income, Wants from the Walls. Budget lines with a start or end date — a mortgage that is paid off, Medicare from 65 — count only in the years they run, so the projections on the following pages change shape as they begin and end.

Needs a month

The Cost of Long Term Care

Pennsylvania median care costs, growing 4.5% a year, with care beginning at 80: home care, then assisted living, then a nursing home. No benefit is in force today, so a claim would come out of the same accounts that fund your income.

	Jeff	Jane
Years of care, from age	2.2 yrs from 80	3.7 yrs from 80
Monthly cost when care begins	$13,700	$14,961
Projected cost of care (future dollars)	$472,124	$909,786
Covered by existing benefits	$0	$0
Uncovered cost of care	**$472,124**	**$909,786**

Projected cost of care

$1,381,910

Both of you, future dollars, before any benefit

Covered by existing benefits

$0

No long-term care benefit in force

Uncovered cost of care

$1,381,910

What a care event would take from the accounts

Long-term care is the largest single risk to a retirement plan: a multi-year claim late in life, paid at then-current prices, out of whatever accounts remain. The Moat is how the Fortress keeps a care event from reaching the accounts that fund your income; its detail is in the Moat page.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

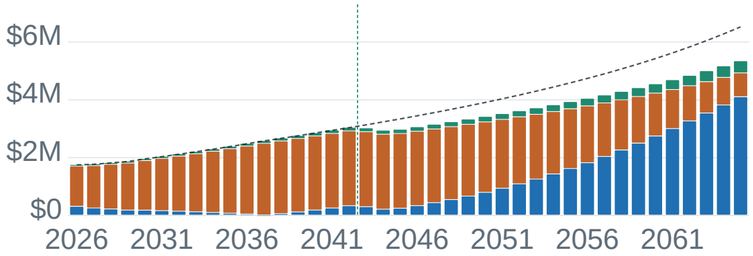

If Nothing Changes and Long Term Care Is Needed

The projection two pages back with a care event added — the previous page's costs: Pennsylvania median costs and the average durations for a man and a woman from the care estimate, at 70% of the projected cost for one person and 49% of the combined cost for both, net of benefits in force. With no Fortress in place the cost comes out of the accounts in the withdrawal order, with the tax on the draw. The dashed line is the projection without a care event.

Taxable accounts · Tax-deferred accounts · Roth accounts · — Without a care event

Jeff needs care

male · 2.2 years of care from age 80 (in 17 years) · 70% of the projected cost

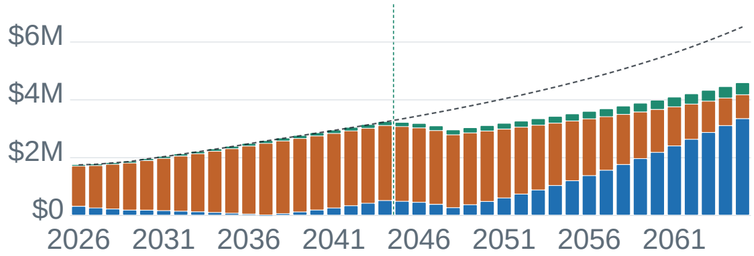

Cost of care	From the accounts
$330,487	$330,487

At end of plan
$5,337,234

−$1,185,955 vs $6,523,189 without a care event.

Jane needs care

female · 3.7 years of care from age 80 (in 19 years) · 70% of the projected cost

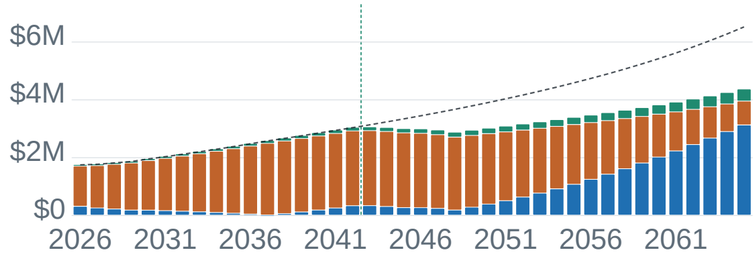

Cost of care	From the accounts
$636,850	$636,850

At end of plan
$4,579,939

−$1,943,251 vs $6,523,189 without a care event.

Both need care

Jeff 2.2 years from age 80, Jane 3.7 years from age 80 · 49% of the combined projected cost

Cost of care	From the accounts
$677,136	$677,136

At end of plan
$4,362,647

−$2,160,542 vs $6,523,189 without a care event.

Your Risk Tolerance, and the Risks We Found

ALTO FINANCIAL GROUP

Current risk score	Risk tolerance	Risk gap	Market exposure
50	**48**	**+2**	**88% → 64%**
The portfolio as held today, 1–100	What you are comfortable with, 1–100	More risk than you are comfortable with	Today, then with the Fortress in place

1 Sequence risk — 88% of assets are exposed to market volatility

$1,557,052 of $1,774,257 in market positions in section 06 today.

2 No withdrawal order plan

Section 16 sets the order: taxable, then tax-deferred, then Roth by default.

3 No Foundation income to cover Needs

Guaranteed income covers 100% of Needs today; the plan's Foundation annuity closes the gap of $25,508.

4 No Walls income to cover Wants

Wants of $32,544 a year; the plan sizes the Walls at $542,400.

5 No estate plan

Section 10: no will or revocable trust on file.

6 No account beneficiaries, or beneficiaries more than 5 years out of date

Section 10: no beneficiaries listed.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Your Current Investment Portfolio

The portfolio totals $1,723,208 across 15 accounts and has a Risk Number of 50, slightly above the clients' own Risk Number of 48. Its 95% six-month historical range runs from -9.66% (-$166,433) to +14.52% (+$250,292), and the allocation is roughly 32% stocks, 3% bonds, 18% cash and 47% other, which is mostly annuities. In the historical stress tests, the portfolio fell less than the S&P 500, for example -23.79% versus -54.78% in the Financial Crisis and -8.45% versus -18.17% in the 2022 Inflation Crash. It also captured less of the gain in the 2013 bull market (+12.31% versus +32.31%).

How the Retirement Fortress Is Built

The "Roof"

- Represents the highest risk growth assets your risk tolerance and portfolio can sustain.
- Growth for your "wishes" and legacy planning.
- Stocks, Mutual Funds, Exhange Traded Funds, Options, Commodities, Private Equity

The "Walls"

- Balanced investments that can provide income to cover your Wants, a hedge against inflation, and near term liquidity
- Corporate bonds, municipal bonds, hard assets, real estate, private REIT's, Buffered Exchange Traded Funds

The "Foundation"

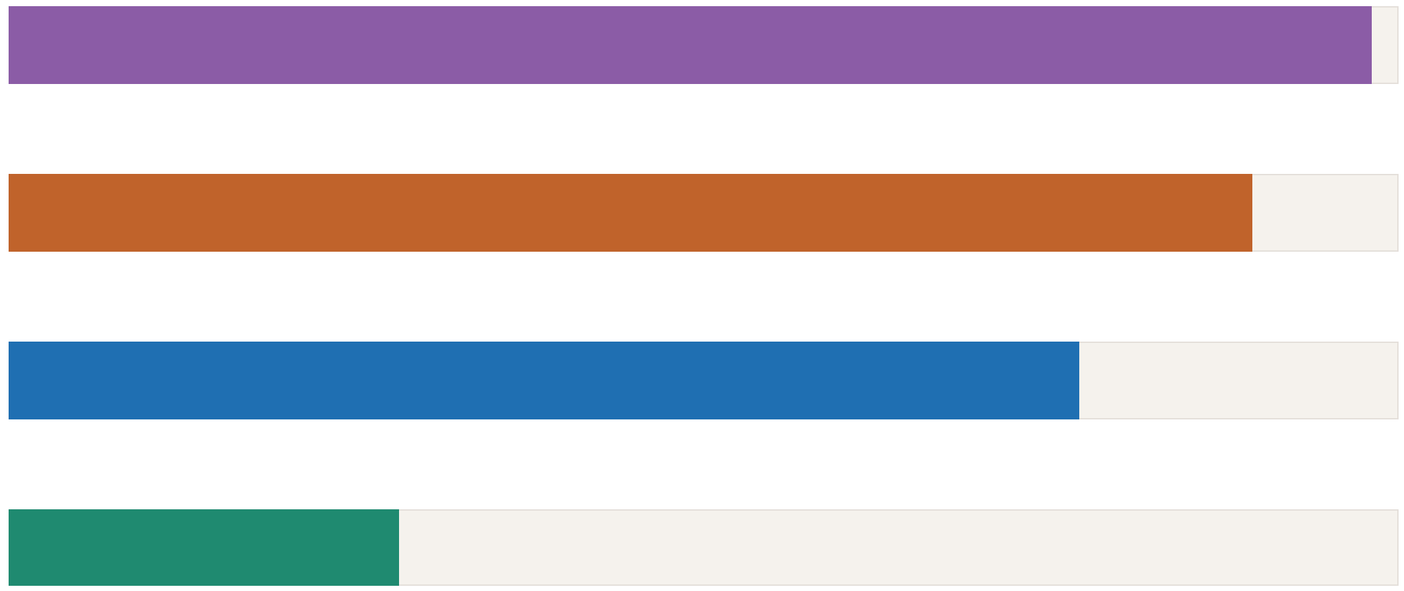

- Stability and income that fund your lifestyle
- Not reliant on the stock market performance
- Social security & pension optimization
- "Liquidity Buffer" for unexpected expenses
- CD's, Savings, Fixed Annuities, Treasuries

The "Moat"

- Protects your plan and estate from long-term care
- Reduce tax risk through stragegic tax planning

Your Retirement Fortress in Dollars

The plan as your advisor has shaped it — the allocation every projection and the transfer sequence are built on. The full bar is each level's target; the solid portion is funded from your accounts.

What’s in the Foundation

The Foundation funds your Needs with income that does not depend on the stock market: a liquidity buffer of 6 months of Needs in savings, and an annuity sized to close the gap between guaranteed income and Needs for life.

Foundation assets

Account	Owner	Custodian / carrier	Amount
Future Inheritancd — liquidity buffer	Jeff	TBD	$41,855
Jeff's Income Anuity — annuity	Jeff	Ceres Life Insurance Company	$425,127
Total			**$466,982**

Foundation annuity

$425,127

Paying about $11,760 a year at the start, guaranteed for life

Liquidity buffer

$41,855

6 months of Needs in savings

Foundation income in 2026

Source	A year
Social Security	$0
Pensions	$0
Annuity income	$3,639
Foundation income	**$3,639**
Needs in 2026	$16,011
Needs not covered by the Foundation	**$12,372**

Needs covered by the Foundation

23%

$3,639 against Needs of $16,011 in 2026

Jeff's Income Anuity: $980 a month guaranteed for life from October 2026. Anything the Foundation does not cover is drawn from the Roof in tax order.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

What’s in the Walls

The Walls hold balanced, lower-risk investments that pay for your Wants and hold liquidity for near-term expenses. They are sized to pay the $32,544 of Wants not met by other income at 6.0%, or the 24-month Needs floor of $167,418, whichever is larger.

Walls assets

The Initial Withdrawal Order and Your Projected Tax

1 **FIRST Taxable accounts**

Non-qualified brokerage, savings and cash.

2 **THEN Tax-deferred accounts**

IRAs, 401(k)s, rollovers and deferred annuities.

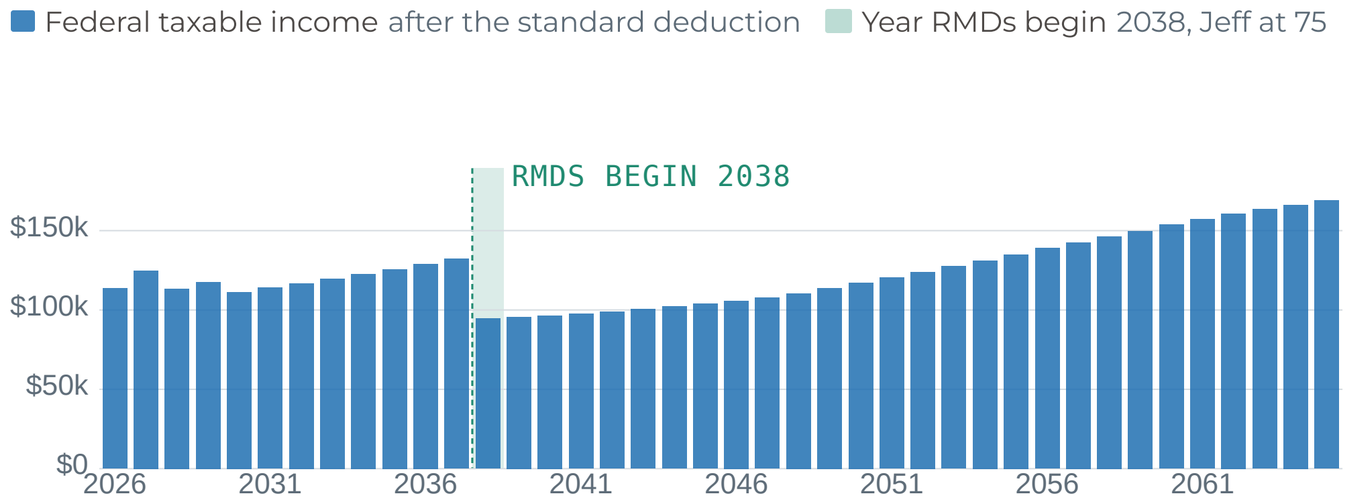

3 **LAST Roth accounts**

Qualified withdrawals are tax-free and there are no lifetime RMDs, so Roth money is spent last and left to compound or pass on.

WITH THE PLAN IN PLACE

$562,242	lifetime federal and Pennsylvania tax
7.5%	average effective rate, all income
12% → 12%	top bracket now, then at full retirement
2038	RMDs begin, Jeff at 75

Federal taxable income, by year

Taxable income is what is left after the standard deduction: salaries while you work, then Social Security (up to 85% of it), pensions, annuity income, interest and the withdrawals the plan takes in the order on the left. The spending order keeps tax-deferred money compounding and leaves tax-free Roth money for last, until required minimum distributions begin in 2038.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Paying Tax at a Known Rate, on Purpose

Convert qualified money from the Roof and Walls to Roth a year at a time from 2026, filling the 12% federal bracket and staying under the IRMAA threshold once Medicare is two years away, and stopping before required distributions begin in 2038. The tax is paid now at a known rate so that later RMDs — and the estate — are smaller and tax-free.

Converted

$542,600

12 years, 2026–2037

Tax on the conversions

$562k with vs $759k without

Roth at the end of plan

$4,674,983

vs $524k without converting

Roth conversions and the tax on them, by year

Each year's conversion is sized to the room left in the 12% bracket after that year's income, and capped so Medicare premiums are not pushed into a higher IRMAA tier. The tax on each tranche is paid from the Roof in the year it is converted, so nothing is borrowed from the Foundation or the Moat. Conversions stop the year before required minimum distributions begin; the next page shows how much smaller those distributions become, and the one after it the tax picture that results.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Your Required Minimum Distributions, With and Without Conversions

From age 75 the IRS requires a rising share of every tax-deferred account to be withdrawn each year, and every dollar is taxed as ordinary income whether or not it is needed. Converting to Roth before then shrinks the balances the schedule is applied to, so the required withdrawals — and the tax on them — fall for the rest of the plan.

RMDs without conversions

$3,692,790

From 2038, peak $182k in 2060

RMDs with the strategy

$1,617,152

From 2038, peak $93k in 2065

Required distributions avoided

What’s in the Moat: Long Term Care Projection

The Moat protects the plan from long-term care and tax risk: an individually owned long-term care contract for each of you, so a care event is paid from the Moat rather than from the accounts that fund your income.

Moat assets

Account	Owner	Custodian / carrier	Amount
Jane LTC Contract	Jane · individually owned	TBD	$112,833
Jeff LTC Contract	Jeff · individually owned	TBD	$57,705
Total			**$170,537**

Moat premium

$170,537

Repositioned from the accounts, not spent

Long-term care benefit

$536,600

2 contracts

Long-term care projection

	Jeff	Jane
Years of care, from age	2.2 from 80	3.7 from 80
Projected cost of care	$472,124	$909,786
Covered by existing benefits	$0	$0
Benefit the Moat buys	**$180,500**	**$356,100**

The Moat pays for care from its own contracts, so a care event never forces a sale from the accounts that fund your income. The projected cost runs above the benefit planned here; the full estimate (Jeff $472,000, Jane $910,000) can be applied as the Moat target for fuller coverage, at a higher premium.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Your Assets Through Age 100, With the Fortress in Place

The Foundation annuity pays out income and the value falls as they do — with guaranteed lifetime income the payment continues for life; the Moat holds its value; the Walls pay for Wants and are spent down last; the Roof compounds at 6.0% and absorbs the withdrawals. With the Roth conversion strategy applied, the plan ends 2065 with $5,744,740.

At full retirement (2026)

With the Fortress in Place, If Long Term Care Is Needed

The previous page with a long term care event added — Pennsylvania median costs and the average durations for a man and a woman from the care estimate, at 70% of the projected cost for one person and 49% of the combined cost for both, net of benefits in force. The Moat pays first; the rest comes out of the accounts in the withdrawal order, with the tax on the draw. The dashed line is the projection without a care event.

Liquidity buffer · Foundation annuity · Walls · Roof · Moat · Without a care event

Jeff needs care

male · 2.2 years of care from age 80 (in 17 years) · 70% of the projected cost

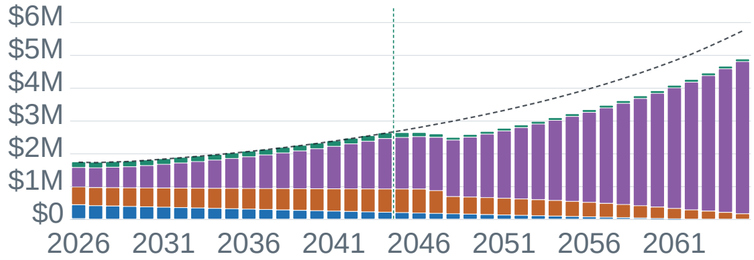

Cost of care	Paid by the Moat
$330,487	$108,288

From the accounts	At end of plan
$222,199	$5,088,998

−$655,742 vs $5,744,740 without a care event.

Jane needs care

female · 3.7 years of care from age 80 (in 19 years) · 70% of the projected cost

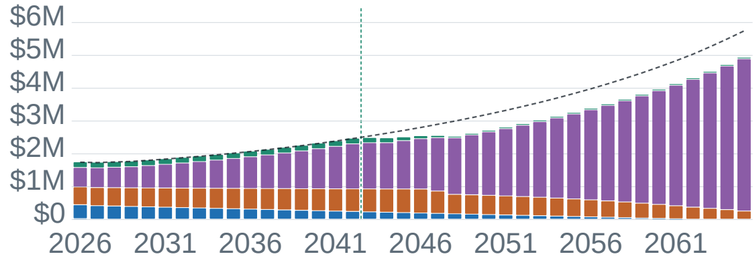

Cost of care	Paid by the Moat
$636,850	$284,880

−$865,585 vs $5,744,740 without a care event.

Both need care

Jeff 2.2 years from age 80, Jane 3.7 years from age 80 · 49% of the combined projected cost

Cost of care	Paid by the Moat
$677,136	$393,168

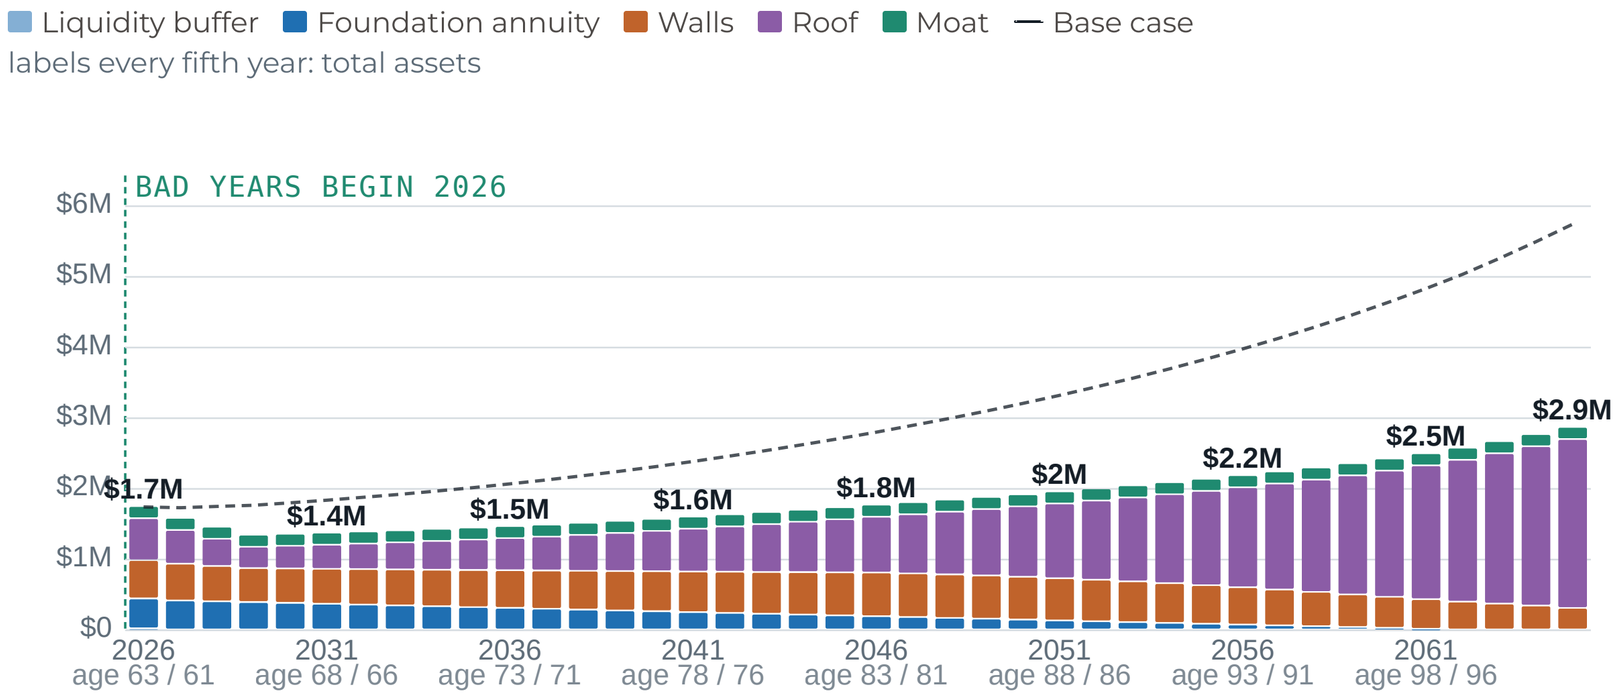

From the accounts	At end of plan
$283,968	$4,928,890

−$815,851 vs $5,744,740 without a care event.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Stress Test: A Bad Start to Retirement

The projection with the Fortress in place, with one thing going wrong and everything else unchanged. The Walls lose 4% and the Roof 15% a year in the first three years of retirement (2026–2028) while withdrawals continue, then returns go back to the assumed rates. The plan still ends 2065 with $2,865,369, down $2,879,371 against the base case.

Three bad years

What This Costs You

Advisory fee on managed accounts of $1,136,738

1.25%

One fee covers the whole relationship: the planning, the investment management, the quarterly reviews and the plan updates in between.

Weighted across $1,774,257 of total plan assets

0.80%

The same fee measured across everything in the plan. It is lower because the protected pieces — the buffer, the Foundation annuity and the Moat contracts — carry no advisory fee.

Our advisory fee schedule

Total assets managed	Annual fee
Under $1MM	1.45%
$1MM – $1.49MM — your band today	**1.25%**
$1.5MM – $1.99MM	1.00%
$2MM – $2.99MM	0.85%
$3MM – $4.99MM	0.75%
$5MM and above	0.65%

What else to expect

- Fund-level expenses inside the managed portfolios are in addition to the advisory fee and are shown against your current holdings' internal expenses in the investment proposal.
- Estate documents are a separate flat cost: $1,000 for a wills-based plan or $3,000 for a revocable trust plan.
- The Foundation annuity, the LTC contracts and any life policies carry no advisory fee, but may pay commissions to Alto Financial Group through AFG II, LLC, disclosed before a contract is entered into.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

Working with Alto

A retirement plan is not something you build once and set aside. It is a living strategy that deserves consistent attention. Four times a year we sit down together for a dedicated planning meeting, each one focused on the topics that matter in that season of your financial life.

THE DIFFERENCE

At most firms you speak with your advisor once a year. Here, four meetings a year is the standard.

Q1

January – March

Goals and insurance review

Goals for the year, plan assumptions, risk assessment, and your life and long-term care coverage.

Q2

April – June

Mid-year health check

Spending patterns, cash reserves, and the allocation against year-to-date performance.

Q3

July – September

Retirement deep dive and estate review

Income needs, Social Security claiming, pension options, and the estate plan.

Q4

October – December

Year-end tax planning

Tax moves for the year, the Roth conversion tranche, required distributions, and charitable giving.

Every meeting opens with an investment performance review. Whatever changes come your way, the goal is for your plan to be one step ahead.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

What Has to Happen to Build Your Fortress

1 Simplify Meeting: Open and Transfer

Week 1

Open 6 accounts at Fidelity — Jeff Rollover IRA, Jane Rollover IRA, Jane Roth IRA, Jeff Roth IRA, Joint After-Tax Account, Jeff's Income Anuity — and sign the transfer forms. Direct trustee-to-trustee transfers; no tax event.

2 Recommendation Meeting: Fine Tuning and Final Sign Off of Plan

Weeks 2–3

Walk through the Fortress level by level, review and approve final investment allocations, annuity and/or life contracts and sign off on the final plan.

3 Fund the Plan

Weeks 3–6

Complete all annuity applications, initiate transfers as needed and implement investment allocations.

4 Move in Day

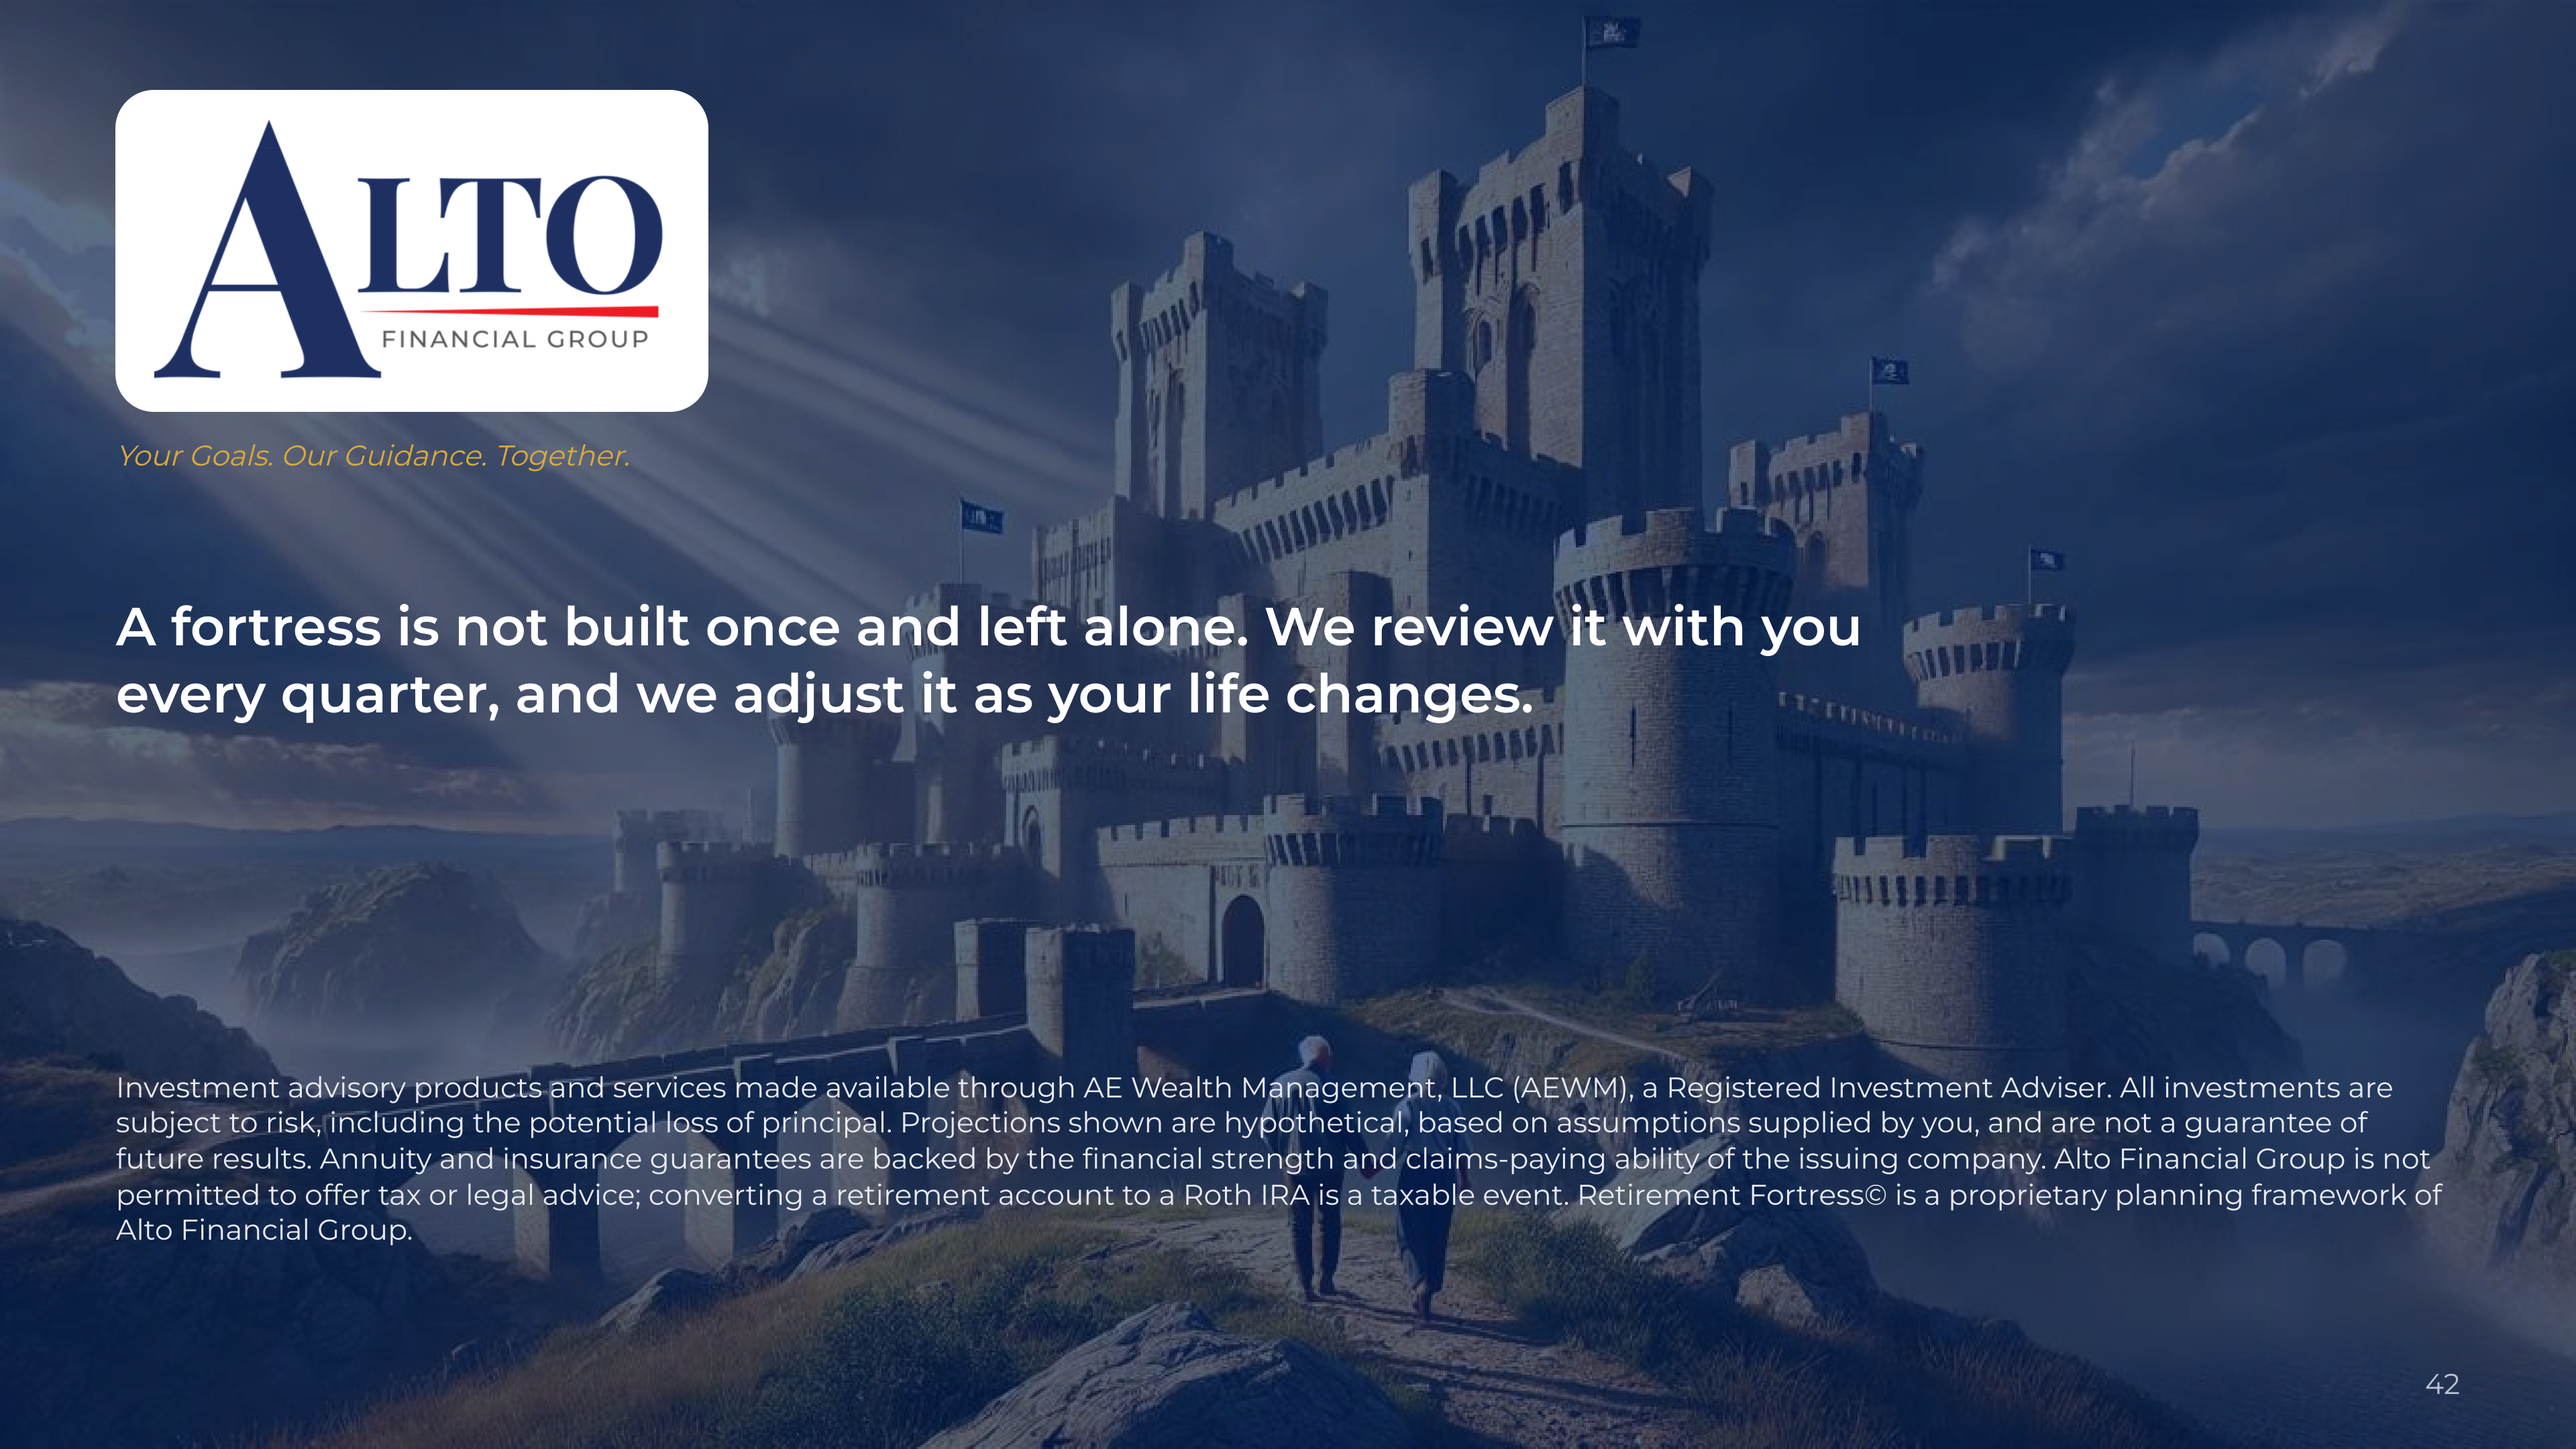

Weeks 6–8

Review your new client portal and the Fidelity apps, and schedule your first quarterly review.

Illustrative only — hypothetical projections from information you supplied, not a guarantee of results. See Important Disclosures, pages 2–3.

ALTO
FINANCIAL GROUP

Your Goals. Our Guidance. Together.

A fortress is not built once and left alone. We review it with you every quarter, and we adjust it as your life changes.

Investment advisory products and services made available through AE Wealth Management, LLC (AEWM), a Registered Investment Adviser. All investments are subject to risk, including the potential loss of principal. Projections shown are hypothetical, based on assumptions supplied by you, and are not a guarantee of future results. Annuity and insurance guarantees are backed by the financial strength and claims-paying ability of the issuing company. Alto Financial Group is not permitted to offer tax or legal advice; converting a retirement account to a Roth IRA is a taxable event.
