Introduction

This analysis projects the Social Security income you can expect under different claiming strategies. It starts from the primary insurance amount (PIA) shown on your Social Security statement and layers on assumptions about how long you will live and how benefits will be adjusted for inflation. The goal is not to predict a single number but to show how the timing of your filing decision changes the income you receive over your lifetime, so the decision can be made deliberately and in step with the rest of your Retirement Fortress plan.

For a married couple, the decision has several moving parts: when each spouse files on his or her own record, whether either spouse qualifies for a spousal benefit on the other's record, and what happens when the first spouse passes away. Because the surviving spouse keeps the larger of the two checks, the higher earner's filing age effectively sets the household's income for the rest of the survivor's life.

Each strategy is ranked by the total benefits received through the life expectancy assumed. A year-by-year schedule for each strategy follows the comparison so you can see the income stream in detail.

Key terms

Primary insurance amount (PIA). The monthly benefit you would receive if you file exactly at full retirement age. The Social Security Administration calculates it from your highest 35 years of indexed earnings. The figure in this report comes from your statement and may change with additional earnings or future COLAs.

Full retirement age (FRA). The age at which you can collect 100% of your PIA. Filing earlier permanently reduces the benefit; filing later earns delayed retirement credits of 8% per year until age 70.

Year of birth	Full retirement age
1943–1954	66
1955	66 and 2 months
1956	66 and 4 months
1957	66 and 6 months
1958	66 and 8 months
1959	66 and 10 months
1960 and later	67

Filing age	% of PIA (FRA 66)	% of PIA (FRA 67)
62	75.0	70.0
63	80.0	75.0
64	86.7	80.0
65	93.3	86.7
66	100.0	93.3
67	108.0	100.0
68	116.0	108.0
69	124.0	116.0
70	132.0	124.0

Cost-of-living adjustments (COLA). Benefits rise each year with inflation as measured by CPI-W. Future COLAs are unknown, so this report applies a fixed 2.5% annual increase. Amounts shown are therefore nominal, future-dollar figures; actual results will differ if inflation differs.

Life expectancy. Social Security is paid for life, so the assumed lifespan drives the lifetime totals and break-even ages. A healthy 65-year-old today has roughly a 50% chance of living past the mid-80s, and married couples should plan for the likelihood that at least one spouse reaches 90.

Spousal benefit. A spouse may receive up to 50% of the other spouse's PIA, reduced if taken before FRA. If you also have your own benefit, Social Security pays your own first and adds only the difference. The higher earner must

have filed before the spousal amount can begin, and under current deemed-filing rules an application for one benefit is an application for both.

Survivor benefit. When one spouse dies, the household keeps the larger of the two benefits. Because delayed credits carry into the survivor benefit, a higher earner who waits until 70 is also raising the income the surviving spouse will receive for life.

Client information and assumptions

Prepared for	Jeff and Jane Smith
Prepared by	Daniel Asti, Alto Financial Group
Marital status	Married
Current ages	Jeff 63, Jane 61
Full retirement age	Jeff 67, Jane 67
Life expectancy	Jeff 85, Jane 88
PIA at FRA	Jeff $3,491, Jane $1,083
COLA assumption	2.5% per year
Benefit reduction stress test	22% reduction beginning 2032; results shown with and without

Strategies compared

The five highest-value strategies from every claiming age 62 through 70 for each spouse. Strategy 1 produces the most lifetime benefit under the assumptions above.

1. Jeff at 70, Jane at 68

- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane claims her own benefit at age 68 in October 2033, $1,084 a month.
- Jane adds the spousal benefit at age 68 in October 2033, adding $614 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

Lifetime benefit: $1,625,767 with 22% reduction from 2032 · $2,084,316 with no reduction

2. Jeff at 70, Jane at 69

- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane claims her own benefit at age 69 in October 2034, $1,194 a month.
- Jane adds the spousal benefit at age 69 in October 2034, adding $630 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

Lifetime benefit: $1,621,628 with 22% reduction from 2032 · $2,079,010 with no reduction

3. Jeff at 70, Jane at 67 (FRA)

- Jane claims her own benefit at age 67 (FRA) in October 2032, $980 a month.
- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane adds the spousal benefit at age 68 in October 2033, adding $614 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

Lifetime benefit: $1,620,133 with 22% reduction from 2032 · $2,077,093 with no reduction

4. Jeff at 70, Jane at 66

- Jane claims her own benefit at age 66 in October 2031, $1,144 a month.
- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane adds the spousal benefit at age 68 in October 2033, adding $614 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

Lifetime benefit: $1,616,319 with 22% reduction from 2032 · $2,071,237 with no reduction

5. Jeff at 70, Jane at 70

- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane claims her own benefit at age 70 in October 2035, $1,308 a month.
- Jane adds the spousal benefit at age 70 in October 2035, adding $645 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

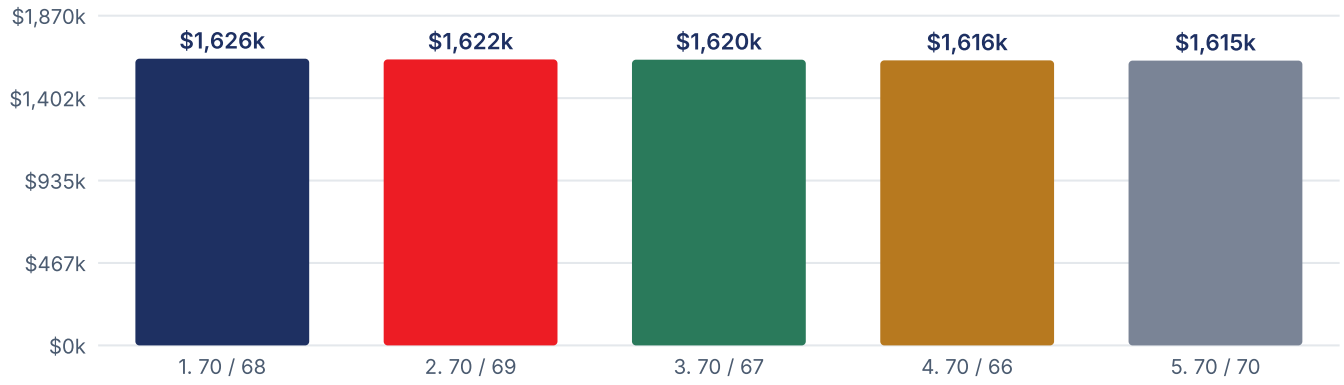

Lifetime benefit: $1,614,956 with 22% reduction from 2032 · $2,070,457 with no reduction

The claiming ages currently in your Retirement Fortress plan: Jeff at 67 (FRA), Jane at 62

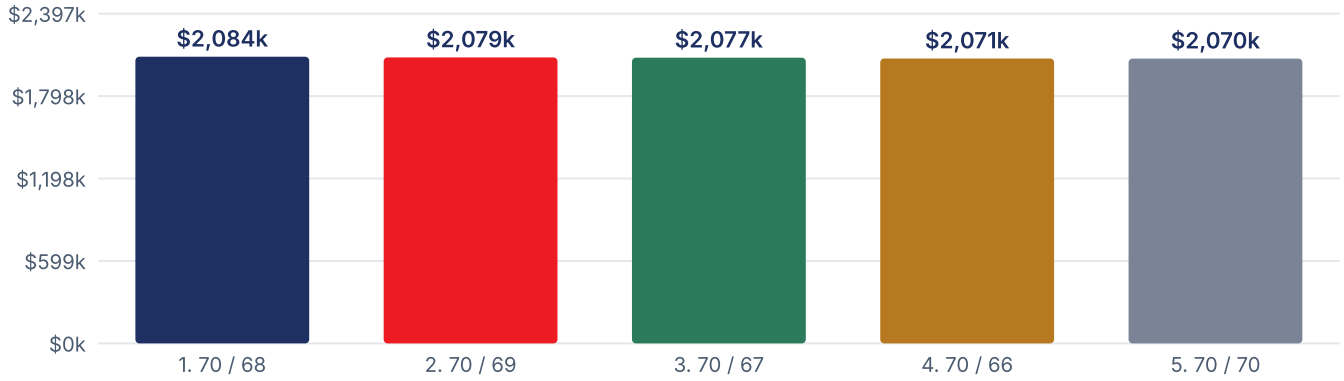

Lifetime benefit $1,479,568 with the reduction — ranks #36 of the 72 strategies tested, $146,199 less than strategy 1.

Comparison of strategies

Lifetime benefits (with 22% reduction from 2032)

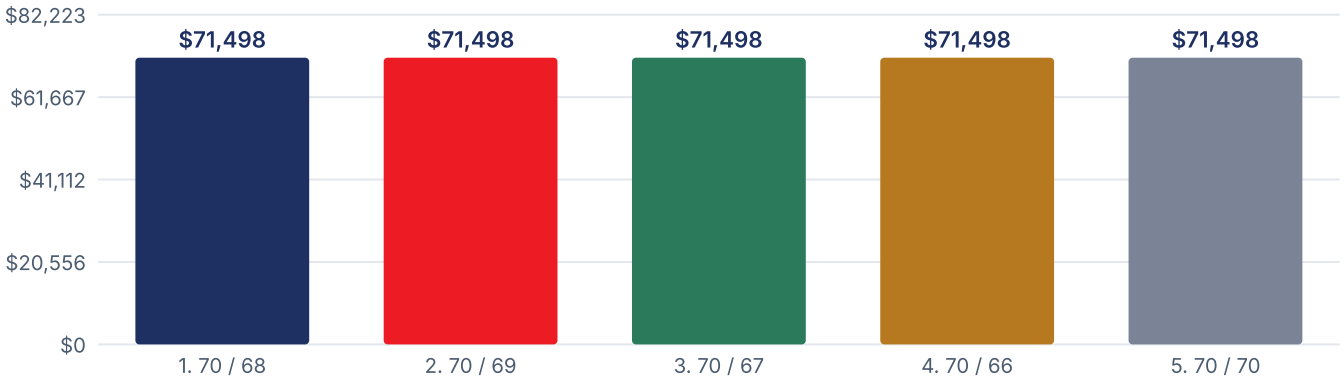

Lifetime benefits with no reduction

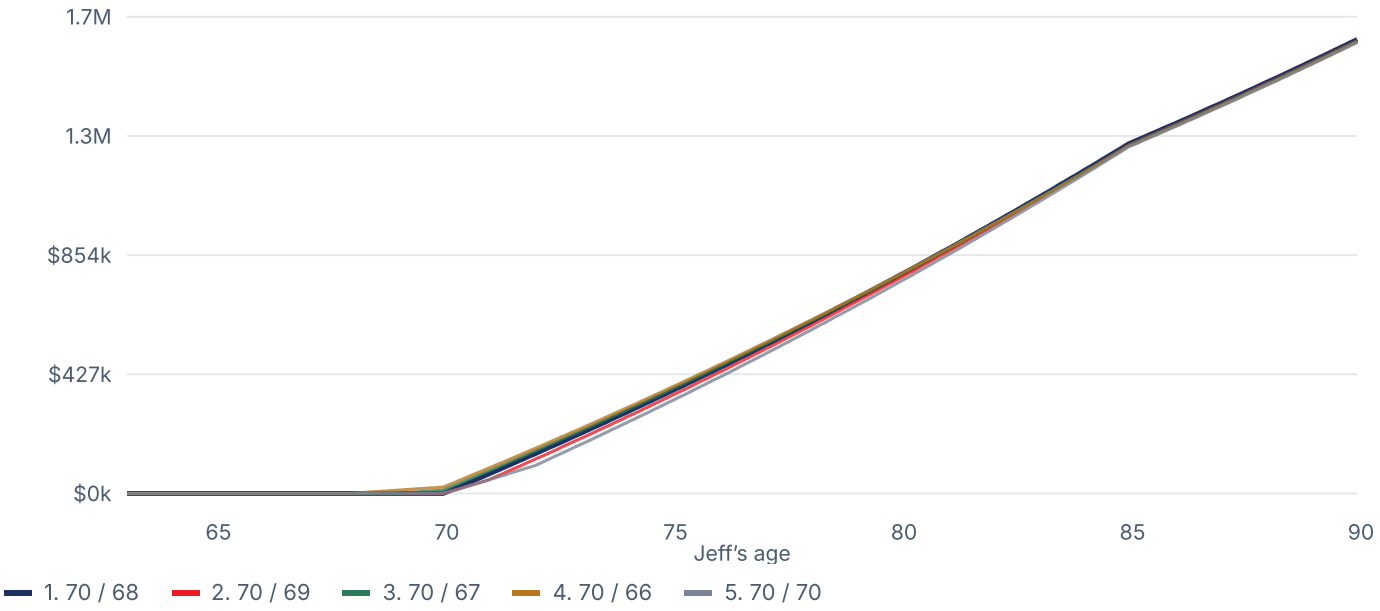

First full-year income for the surviving spouse (2049)

Annual income Jane would receive in the first full calendar year after Jeff passes, under each strategy.

Cumulative benefits over time

Where lines cross is the break-even age between two strategies.

Break-even ages (Jeff's age)

The age at which each strategy's cumulative benefits catch up to the alternative. Green: reached before the assumed life expectancy of 85. Red: the earlier filing would still be ahead.

Strategy	Catches up to filing earliest (63y 1m / 62) — with reduction	— no reduction	vs. #1	vs. #2	vs. #3	vs. #4	vs. #5
#1 — 70 / 68	80y 6m	78y 11m	—	always ahead	80y 9m	81y 1m	always ahead
#2 — 70 / 69	80y 9m	79y 3m	never (within horizon)	—	84y 5m	83y 7m	always ahead
#3 — 70 / 67	80y 6m	78y 10m	ahead until 80y 9m	ahead until 84y 5m	—	81y 7m	always ahead
#4 — 70 / 66	80y 5m	78y 9m	ahead until 81y 1m	ahead until 83y 7m	ahead until 81y 7m	—	always ahead
#5 — 70 / 70	81y 1m	79y 8m	never (within horizon)	never (within horizon)	never (within horizon)	never (within horizon)	—

1. Jeff at 70, Jane at 68

- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane claims her own benefit at age 68 in October 2033, $1,084 a month.
- Jane adds the spousal benefit at age 68 in October 2033, adding $614 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

Lifetime benefit: $1,625,767

Amounts include the 2.5% COLA assumption and the 22% reduction beginning January 2032. The Monthly column shows the first and last monthly amount of the year when they differ. Figures are estimates in future dollars.

5. Jeff at 70, Jane at 70

- Jeff claims his own benefit at age 70 in October 2033, $4,014 a month.
- Jane claims her own benefit at age 70 in October 2035, $1,308 a month.
- Jane adds the spousal benefit at age 70 in October 2035, adding $645 a month.
- Jane switches to the survivor benefit at age 83 in October 2048, $5,813 a month.

Lifetime benefit: $1,614,956

Year	Jeff					Jane					Household

Amounts include the 2.5% COLA assumption and the 22% reduction beginning January 2032. The Monthly column shows the first and last monthly amount of the year when they differ. Figures are estimates in future dollars.

How to claim your benefits

The strategies above indicate when each spouse should file. A spousal benefit cannot start until the other spouse's own application has been processed, so if both are filing in the same window, the higher earner should file first and the lower earner should wait for confirmation before applying. If the lower earner files on his or her own record years before the higher earner, remember that the spousal top-up is added automatically once the higher earner files.

1. **Review the plan with your Alto advisor** so the filing dates fit with your other income sources, Roth conversions, Medicare enrollment and tax picture.
2. **Open a my Social Security account** at ssa.gov/myaccount and confirm that your earnings record is complete and the PIA matches the figure used here.
3. **Apply up to four months before** the month you want benefits to begin. Benefits are paid the month after they are due.
4. **File online** at ssa.gov/apply, **by phone** at 800-772-1213 (TTY 800-325-0778), or **in person** by appointment at a local office. Survivor benefits cannot be filed online; call or visit an office with the marriage and death certificates.
5. **Have on hand:** Social Security number, proof of birth or citizenship, marriage certificate for spousal or survivor claims, your most recent W-2 or tax return, and bank details for direct deposit.
6. **Enroll in Medicare separately at 65** if you are delaying Social Security; enrollment is not automatic unless you are already receiving benefits.
7. **Check the award letter.** When the application is processed you will receive a benefit verification letter showing the amount and start date. Confirm it matches the strategy you chose.
8. **Changing course:** an application may be withdrawn once within 12 months by repaying benefits received (Form SSA-521), and benefits can be voluntarily suspended after FRA to earn delayed credits.

What this report does not include

The figures are estimates, not guarantees. Your exact benefit is not known until Social Security processes your application. The purpose of this report is to show how the timing of your decision changes lifetime income, not to predict the precise amount of any check.

Results depend on assumptions you supplied: the PIA from your statement, life expectancy, and the 2.5% COLA. If any of these turn out differently, so will your actual benefit stream. We are glad to re-run the analysis with different assumptions.

Taxes are not included. Depending on your other income, up to 85% of benefits may be taxable at the federal level. Please consult your tax professional.

The earnings test is not included. If you file before FRA and continue working, some or all of your benefits may be temporarily withheld.

Not modeled: the Windfall Elimination Provision and Government Pension Offset, disability or dependent-child benefits, restricted applications, and Medicare premium deductions.

Laws can change. Congress may alter the benefit formula, full retirement age, COLA method or trust-fund outlook at any time. The benefit-reduction scenario shown is a hypothetical stress test based on the projected trust-fund depletion date and is not a prediction.

This report is one piece of a larger plan. Social Security should be evaluated alongside your pensions, retirement accounts, withdrawal sequencing and legacy goals as part of your overall Retirement Fortress plan. **Always consult your Alto Financial Group advisor before making any filing decision.**
